Kitchen Print #3 BAR

Kitchen / Bar Ticket

Each menu item can be set to print to one or more kitchen or bar printers. As new or changed items are added to an order they are automatically sent to the appropriate printer.

Customer Receipt

At any time a customer receipt (top left) can be generated from or sent to any POS station with a thermal receipt printer. Customer graphic logo, text header and footer can be added for a unique style and personal message.

Credit Card

Optional integrated credit card processing handles transactions quickly and efficiently. All POS order authorization and tip transactions are processed from a singe shared telephone line or at high-speed via the internet.
