

PrISM POS Product Overview

POsitively Outstanding, Pizza Delivery and Restaurant Management Solutions.

Two Decades of innovation

Backed by over two decades of customer driven innovation, Microworks PrISM POS offers an ideal computer system for pizza delivery, restaurant management and franchise food service. Complete with detailed sales reporting, inventory controls, food cost and labor cost analysis, this Microsoft Windows XP based system features simple, intuitive touch screen ordering software for table-service, delivery, take-out and catering. With a simple, intuitive user interface, first-time users can be trained and taking orders within minutes. In addition to our rock solid traditional POS functionality Microworks now fully supports a tightly integrated web ordering module for a complete end-to-end technology platform.

Unequaled Value

Microworks leads the industry in providing feature-rich, cost-effective, delivery automation and point-of-sale solutions. With greatly reduced up-front costs, Microworks can provide a complete store package within your budget. We offer a variety of systems, from pizza delivery, to state-of-the-art touchscreen restaurant automation solutions. Our support staff will pre-configure your system to arrive with your menu, pricing, and inventory, setup and ready to go. We will analyze your operations, and integrate your system to work the way you do.

Better Service

PrISM POS products allow your store locations to provide customers with a higher level of personal service. With instant access to address, order history, and delivery information, your customers are all “regulars”. Let PrISM minimize the people traffic in food preparation areas, so your employees can focus on the customer. Streamline your operations, so your customers can expect top-notch service with every order.

The Essential Ingredient

Stores that use automation manage higher sales volumes with fewer mistakes and less labor. Our customers report significantly increased peak-sales volume capability, while actually reducing labor costs. Your PrISM system will eliminate costly mistakes before they happen!

Complete Solution

PrISM POS not only replaces your cash register, time clock, and bookkeeper, it also provides the platform to completely automate every aspect of your operation. Automated ordering can dramatically reduce the time to place an order, while increasing accuracy and control. Kitchen printers reduce steps, traffic, and confusion. Drivers are provided clear and accurate delivery information while Managers are provided vital sales statistics within seconds.

PrISM[®] TURN-KEY SYSTEMS
